

A FEW GOOD DASH CAMS

A Parody

Can you handle the truth? Are you entitled to it? If you're a driver, you most certainly are.

We live in a world that has cars. And those cars have drivers who need to be guarded from fraudulent accident claims.

Who's gonna do it? Some stranger walking by that only saw part of what happened or maybe the off chance another driver approaches seconds after the crash, only to say he saw some of what happened? Don't count on either. Most people don't wanna get involved.

Some drivers don't believe that hundreds of motorists are cheated, robbed and scammed by fraudulent accident claims daily. Many weep for those drivers and curse the system but do nothing about it. Being protected is a luxury and a necessity and now you have the luxury of knowing how to better protect yourself, along with the opportunity to do it.

Unscrupulous drivers, drunk drivers, scam artists and the like, while grotesque and incomprehensible to you, do exist and their numbers increase daily.

You don't wanna drive unprotected, because deep down, in places you don't talk about at red lights, stop signs or at parties, you know you could be the victim of a fraudulent accident claim. You want to be protected - You need to be protected - You deserve to be protected. The good dash cam, the right dash cam, has a greater responsibility than most people initially fathom.

We have both the time and inclination to provide a witness for everyone driving the roadways. We have many already traveling beneath the very blanket of protection we provide because we relayed the manner in which we provide it, how we provide it, why we provide it and even a fair price to provide it.

We use words like 1080P, G-Sensor, Cyclic Recording...we use these words to describe the very backbone of the protective system we provide. Some people use'em merely as a punchline for a YouTube video.

Whether you've considered protecting yourself from fraudulent accident claims or not, either way, we suggest you check out all the features, realize they make sense then order one, and be on your way driving, proud you took action to better protect yourself and your loved ones from ruthless drivers who cause accidents then exhibit a loose association with the truth, by claiming it was all your fault.

Ok, so it's a little overboard but if Jack Nicholson read it out loud, it would be a blast.
